

November 20, 2020

The message for this Friday is brief as there will be another correspondence coming before the holiday next week in a message from the President.

This week the Board President, Ronn Babin, BECI Engineers, Marcel Lopez of CRM Construction, Kevin Gilliland, roofing contractors and The City of Orange Beach Fire Marshall and Building inspectors were onsite to assess the current situation of the building.

During the week, a lot of data was compiled while inspecting and testing the facility. The data is currently being reviewed as well as the potential impacts they will have on the comeback process.

Next week, by Wednesday at the latest, some very specific timelines and details will be sent in an in-depth email to owners and posted to the Owners Corner. Items such as roofing, exterior wall inspections, etc. will be factors in the discussion.

Everyone is anxious to know the timeline and how we are progressing forward. By next week, we will have more detail and expected estimated timelines and how the rebuild scope and project flow. Expected opening dates, phasing, how we will reopen, and more information to follow.

Your patience is greatly appreciated, and we look forward to a more in-depth review for you next week.

Sincerely,
Resort Management
